CyberSoul Pressemappe

---

1. Overview: What is CyberSoul?

CyberSoul is more than a genre of music – it's a **movement** that redefines the boundaries between **technology** and **emotion**. The genre combines **human-written lyrics** with **AI-powered music production**, creating a unique soundscape that feels both familiar and futuristic.

CyberSoul stands for **transparency** and **authenticity** at a time when music production is becoming increasingly automated. It emphasizes **human creative control**, while AI serves as a tool to expand musical expression.

CyberSoul differs from pure AI music in that it combines the emotional depth of human lyrics with the precision of modern technology – without losing the soul of the music.

---

2. The vision behind CyberSoul

CyberSoul was founded to create a clear **separation between fully music-made music** and **hybrid music** . It offers artists the opportunity to use AI as a creative tool without losing the emotional depth and authenticity of their music.

As a **pioneer of CyberSoul,** I not only want to present my own music, but also provide a **platform for other artists** to publish their works under this innovative genre. The goal is to build a **community** that actively shapes the future of music.

3. Audio samples from my productions as Authority Imagination

- [Rise from the Ashes auf Spotify](#)
- [I've got your back auf SoundCloud](#)
- [Rise for Tomorrow auf Spotify](#)

---

4. Visual identity

The **CyberSoul logo** symbolizes the connection between technology and emotion: a **soundwave** that merges into a **human-AI hybrid form** underlines the symbiosis of human creativity and technical innovation. The **album cover** captures this vision with futuristic colors and glitchy effects.

---

5. Next steps to establish CyberSoul

1. **Contacting streaming platforms:**
   We will **be contacting** Spotify, Apple Music **and** SoundCloud to integrate **CyberSoul** as an official genre. The goal is to establish the genre in the **genre lists** of streaming platforms.
2. **Building an artist community:**
   We are creating a platform where artists can release their music under the **CyberSoul label. Collaborations** and a separate **Spotify playlist** for CyberSoul tracks are planned.
3. **Media presence & cooperations:**
   We will establish targeted **media contacts** in the music and tech scene in order to promote the genre. Collaborations with **music blogs** and **influencers** are being planned.

Interested artists, labels or media partners are invited to get in touch with us to shape the future of CyberSoul together.
